

Dr. Xiaogang Li is Professor at the Corrosion and Protection Center of the University of Science and Technology Beijing (USTB) and also at the Beijing Advanced Innovation Center for Materials Genome Engineering. He also serves as Deputy President of the Chinese Society for Corrosion and Protection (CSCP) and Director of the National Environmental Corrosion Platform (NECP) of China. His research interests in basic and applied corrosion research include corrosion-resistant steels, environmental degradation of metals and coatings, stress corrosion cracking and corrosion data mining and modelling. He has published over 400 peer-reviewed papers on international journals. He has received multiple Chinese and international awards including two National Science and Technology Progress Awards and NACE Technical Achievement Award.
